A COOPERATIVE, INTERACTIVE, HEURISTIC  
SYSTEM FOR THE CREATION AND ONGOING  
MODIFICATION OF CATEGORIZATION SYSTEMS

ABSTRACT OF THE DISCLOSURE

10 An Internet-related invention comprising hardware and software constructs that operate substantially interactively and, to a degree, automatically, to produce search categories and search attributes that facilitate the creation, indexing and searching for  
15 physical and informational items stored on Internet databases and the like. Thereby, hosts of databases or the listers of information on databases, are able to interactively and dynamically, modify, augment or correct attributes based on the activity of end  
20 searchers, business needs of listers and hosts and the like.
